

PRODUCT INFO SUBMERSIBLE PUMP TERA

Sewage / submersible pumps from Rössle – Powerful, durable and hard-wearing

They are indispensable for fire departments during water-related operations: efficient and resistant sewage / submersible pumps that easily and quickly pump out the water masses and suspended matter contained therein. The electric sewage water / submersible pump TERA is ideally suited for these applications. It is also suitable for supplying fire-fighting water and for overcoming larger distances.

The electric sewage/submersible pump is made for rough operations: In use, it reaches a maximum delivery pressure of 2.4 bar and thus pumps water up to a height of 24 metres. Due to the inlet grain size of \varnothing 11 mm, it also pumps out contaminated water without any problems in continuous operation via the hose connected to the B-Storz coupling. In addition, it convinces with a maximum immersion depth of 20 metres, constant readiness for use, robust materials and a solid construction.

With the new sewage/submersible pump TERA from Rössle AG, your fire department is well equipped in case of emergency during floods, heavy rain and inundations.

- Connection: B-Storz coupling
- Sturdy and robust design
- Excellent for large water masses
- Insulation class F; protection class IP 68
- Inlet size \varnothing 11 mm
- 10 m cable length

SEWAGE / SUBMERSIBLE PUMP TERA

TECHNICAL DATA	Item No. HYDZ004
PUMPING CAPACITY	1,000 l/min // 60,000 l/h
PUMP POWER	4,000 Watt
ENGINE	3~ 400 V three-phase 50 Hz
MAX. PUMPING PRESSURE	2.4 bar
WEIGHT	50 kg
MATERIAL	Stainless steel and chrome
DIMENSIONS	24 x 55 cm (D x H)

PUMP CHART

The diagram shows you the pumping capacity of the Rössle submersible pump TERA in m³ per hour in relation to the pumping height.
