

PRODUCT INFO WATER RESCUE BOX

Water Rescue Box - your reliable emergency tool for floods and inundations

Flooded basements and rooms are an increasingly common occurrence due to the rising number of floods and heavy rain events. When water enters basements and rooms, the only option is to pump out the space as quickly as possible to avoid major damage. With the Water Rescue Box, we provide you with a reliable and instantly ready-to-use help kit that you can use to quickly combat the masses of water.

The individual components of the Water Rescue Box are stored in a robust, standardised and stackable plastic box with a lockable lid - protected from dirt and dust. In addition to the pump, a 3 m dimensionally stable hose, a 15 m fire hose, size C42, a PRCD personal protection switch as well as a retaining rope and a coupling key are included. The Water Rescue Box is available in two versions:

- Version 1: sewage pump MEGA suited for rough conditions, with float switch
- Version 2: flat suction pump FLAT-ROSS for flat suction up to a water level of 1-2 mm, dry-running safe

With the Water Rescue Box, you will have a reliable and effective assistant at your side, with which you can remove penetrated water quickly and easily.

- Two versions available: sewage / submersible pump MEGA - or - submersible pump / flat suction pump FLAT-ROSS
- Incl. 3 m dimensionally stable hose, 15 m fire hose C42, PRCD personal protection switch, 20 m retaining rope and coupling key
