

PRODUCT INFORMATION HYDRA-BOY

HYDRA-BOY - THE SMALL POWERHOUSE

With its flexibility and excellent manageability, the HYDRA-BOY is convincing even in the most restricted spaces. In relation to its low weight and space-saving dimensions, the HYDRA-BOY has a powerful sewage pump and a powerful suction turbine with an extraction capacity of 8,000 l/h.

With a suction passage of 38 mm, the HYDRA-BOY can easily cope with smaller stones and mud. The tear-resistant, easy-to-empty net bag inside the unit collects coarse solids sucked in and thus protects the sewage water pump. Thanks to its long suction and drainage hoses, the HYDRA-BOY can be used in a wide range of applications with plenty of room for manoeuvre. The extensive range of accessories with versatile applications makes the HYDRA-BOY a strong helper in an emergency.

- Flexibility and perfect handiness in the tightest of spaces
- Low operating weight
- 45 l tank
- Sturdy and compact design
- 10 m long suction and drain hoses
- No service-intensive electronics
- Cable length 10 m including Schuko type plug; protection class IP 68
