

INFORMATION ADDITIONAL PACKAGE

Additional package for the HYDRA FD vacuum cleaner

The additional package for the HYDRA was developed especially for the needs of company and plant fire departments. Stored in a box, the accessories include nozzles, a hose and stainless steel suction pipes in oil-resistant quality. The Storz connections on the tank can also be closed with the blind coupling and the ball valve to be able to safely roll small quantities of sucked-in liquid in the unit for disposal. The approx. 70 litre capacity of the HYDRA tank is thus tightly sealed.

Especially in industrial production plants, leaking coolants or hydraulic oils are often a matter. With the combination of HYDRA and the additional package, you are fully prepared for these emergencies.

TECHNICAL DATA ADDITIONAL PACKAGE

(additional package and storage box)

Weight	10 kg
Dimensions storage box (W x L x H)	60x40x24 cm
Material storage box	Polypropylene

STORAGE BOX CONTENTS
